Professional Summary

Aspiring AI/ML Engineer building LLM-powered agents, RAG systems, and applied ML models. Focused on designing agent workflows that transform unstructured inputs into structured, actionable outputs.

Work Experience

Agentic AI Intern - ActuallyFair

August 2025 - September 2025

- Built agent workflows using n8n to automate marketing and operational tasks.
- Developed AI-assisted UGC ad generation system leveraging internal datasets.
- Improved workflow efficiency in direct-to-consumer operations.

Data Analyst Intern - Generative AI Consortium

November 2024 - April 2025

- Built classification and clustering models using Scikit-learn and TensorFlow.
- Conducted exploratory data analysis and feature engineering.
- Assisted in preprocessing and evaluation of ML models for deployment.

Projects

AI Engineer - OlfactiveEcho (Agentic Fragrance Recommendation System)

Jul 2025 - Oct 2025

- Architected an LLM-powered recommendation agent for semantic perfume discovery and contextual product guidance.
- Designed a preference-based quiz to collect user inputs for personalized fragrance recommendations.
- Integrated local LLM with output control and fallback logic for reliable responses.

Machine Learning Engineer - Construction Procurement Assistant (CPA)

Sep 2025 - Jan 2026

- Designed an agent-driven procurement workflow converting raw land inputs into structured parameters for downstream forecasting.
- Developed an XGBoost-based material estimation model predicting construction material quantities.
- Implemented retrieval logic mapping predicted materials to nearby vendors using curated supplier datasets.

AI Developer - Hiring Automation System (Recruitment Workflow Automation)

Dec 2025 - Jan 2026

- Built an n8n workflow automating job posting, resume collection, and candidate tracking.
- Implemented resume parsing and automated screening from job descriptions.
- Developed a dashboard to track candidate progress across the hiring pipeline.

Technical Skills

Languages: Python, JavaScript, Java, C

AI / LLM: RAG, LLM Agents, LangChain, LangGraph, XGBoost, TensorFlow, Scikit-learn

Backend: FastAPI, Node.js, MongoDB, SQL

Automation & Tools: n8n, Docker, Git, Linux, FAISS, ChromaDB, Ollama

Education

B.Tech (Artificial Intelligence & Machine Learning)

2023 – Present

Kongu Engineering College CGPA: 8.46

Higher Secondary (CBSE)

2023

Vidyaa Vikas International School 90%
